Islamic Monetary Economics

Instructor: Dr. Salman Ahmed Shaikh
Email: islamiceconomicsproject@gmail.com

Course Description
This course will cover the core principles of Islamic monetary economics and finance and their application in the contemporary financial system. It will enable the students to gain an understanding of the workings of Islamic economic principles in the financial and monetary system and get exposure to the current challenges and impediments in the transformation of current financial and monetary system into an exclusively Islamic financial and monetary system.

Course Objectives
The course sets forth the following objectives:

- To learn the core principles of Islamic monetary economics and finance and see their application in the contemporary financial system.
- To study the role of money, financial intermediaries and financial transactions and contracts in Islamic monetary system and contrast it with contemporary monetary system.
- To understand the function of central bank in Islamic financial system and the tools and policy instruments available to the central bank in the Islamic monetary and financial system.
- To acquire understanding of how to conduct monetary policy and function of monetary management within Islamic principles, contracts, instruments and institutions.
- To explore and evaluate evidence of monetary policy transmission in dual monetary system.

Teaching Methodology
The course will be rigorous and introduce Islamic economic theory in contrast with mainstream economic theory. Powerpoint presentations will be used to bring focus and structure in lecture delivery and facilitate participants in keeping up with the flow of contents. For each lecture, concise handouts with lecture notes will be distributed to ensure reinforcement and sufficient reference material. Data, statistics and research papers shall be readily used during class discussions to bring substance to the discussions. During the course, there will also be guest speaker sessions and a seminar to help gain contemporary research trends, issues and methodologies in Islamic economics and finance.
